Dear Sri Sarjana,

the manuscript EVALUATION OF HOSPITAL PERFORMANCE THROUGH EFFECTIVENESS OF RESOURCES AND REPUTATION: A CASE STUDY OF HOSPITALS IN WEST KALIMANTAN, INDONESIA, submitted to Problems and Perspectives in Management Journal, needs to be revised.

Comments:

We ask you to align the manuscript following the Guidelines <https://businessperspectives.org/journals/problems-and-perspectives-in-management#submission-guidelines-for-authors>

Please, pay attention to grammar and spelling. Also, we are using American English.

Please, pay attention that the research paper, which is a final report on the finished original experimental study, the structure is Abstract, Introduction, Literature review, Method, Results, Discussion, Conclusion.

Carefully divide text between sections. Do not divide sections into small subsections and do not involve additional sections.

The number of words in the paper may vary from 4000 to 6000. Considering the issue concerning the calculation of the number of words in the paper, the information about the authors, title, abstract and keywords, list of references and appendix (up to 5 pages) should not be included.

Clearly and concretely state the aim of the study. In the title of the article, do not emphasize a specific hospital (in the aim as well).

Write the Abstract according to the following algorithm: first two or three sentences indicate the relevance of the topic; the aim and object of the study; the methodology (methods) of the study (for theoretical studies – its theoretical basis) are described; the obtained results and their practical value are characterized. Dedicate most of the Abstract to the result. While demonstrating it, provide quantitative characteristics. The volume of the Abstract should be 150-250 words.

The keywords should reflect the area of the research. The number of keywords should be 5-10 in average. There should not be the sentences, but the words or word groups. There is no need to replicate words from the title of the manuscript.

Clarify JEL classification codes.

The Introduction (0,5-1 page) should be devoted exclusively to the relevance of the research topic and the formulation of the problem in general.

The Literature review (40-50 analyzed sources) should be completed by formulating the Aim. Then provide hypotheses (right here and all together, do not place the text between them). Then should be Methods.

The Result section is the main section of the article.

The Discussion section should discuss the results of the study, compare with previous ones, discuss why the authors have such results, determine future prospects.

The Conclusions were built incorrectly. There should be such logic in the Conclusions - indicate the aim of the research, briefly demonstrate the result, indicate what conclusions should be drawn from it. Do not refer to the sources here.

Sentences from the Conclusions should not be repeated in the Abstract.

The deadline for revisions is 2022-01-20

The Introduction (0,5-1 page) should be devoted exclusively to the relevance of the research topic and the formulation of the problem in general.

The Literature review should be completed with 2-3 generalizing sentences and then formulating the aim of the study. Then provide hypotheses (right here and all together, do not place the text between them). Then should be Methods. Significantly strengthen it.

The Discussion section should discuss the results of the study, compare with previous ones, discuss why the authors have such results, determine future prospects.

The Conclusions were built incorrectly. There should be such logic in the Conclusions - indicate the aim of the research, briefly demonstrate the result, indicate what conclusions should be drawn from it.
